

# Remmie<sup>®</sup>3

## Enables Telehealth Visits for ENT Health

The Next Generation Intelligent Otoscope + API + AI for ear, nose, and throat care for accessible diagnosis and timely intervention

### Provider Outcomes

Meet ENT Patients where they are

Drive more follow-up visits to reach higher Standard of Care

Prevent ENT patients using Urgent Care or ER for Primary Care

Reduce medical stress for Patients and their Caregivers

### Patient Outcomes

Divert in-person visits to Telehealth

Immediate access to healthcare with integrated telehealth options

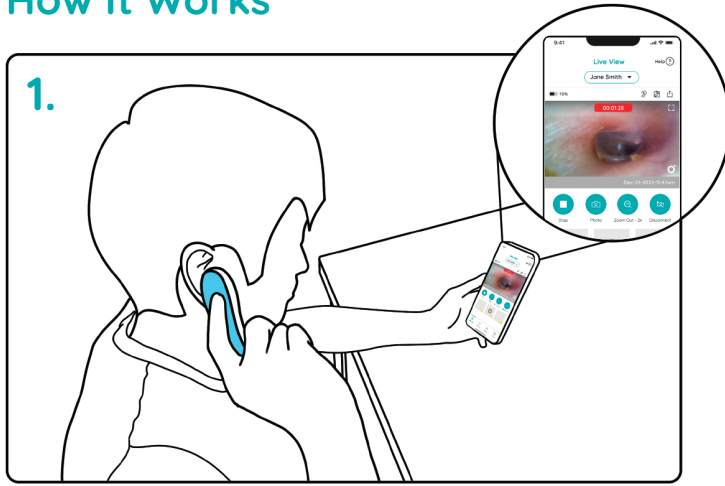

Continuous monitoring until symptoms recede

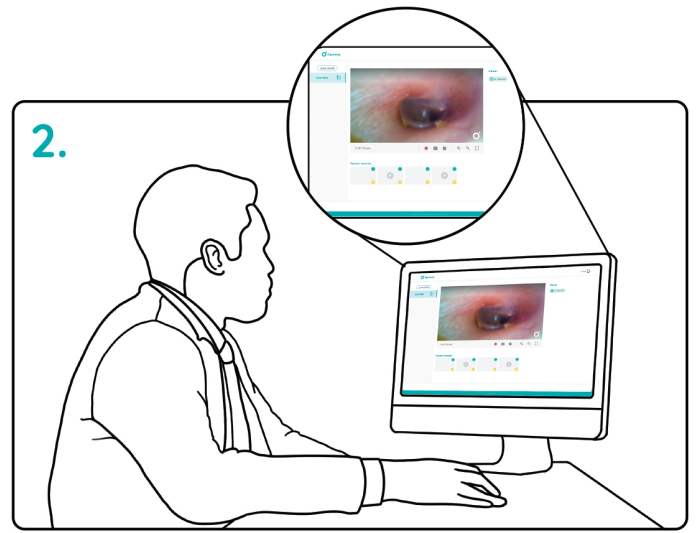

Record and Save videos/pictures for future use

## How It Works

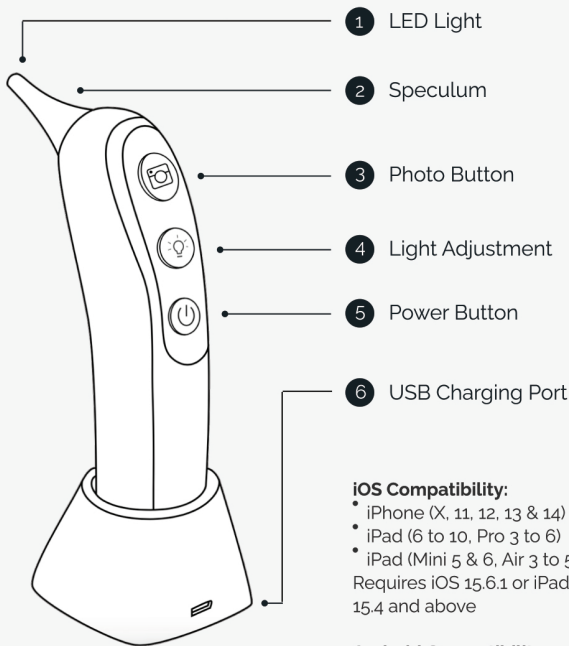

1. Patient uses Remie at home to see and record ENT symptoms

2. Physician can live stream or review uploads on telehealth or e-care visits

## Seamlessly integrates into your telemedicine platform & EMR

### iOS Compatibility:

- iPhone (X, 11, 12, 13 & 14)
