

## With Lockdown soon to be over, are you prepared for the new normal of sanitisation and social distancing requirements in your office?

- Solo-Screen Partitions help provide individual work zone protection to reduce the spread of droplet infection.
- Clear acrylic partitions maintain current office layout visibility.
- Removable when not required, no visible fixing holes, slides into existing fittings.
- Fast and efficient to install.
- Allows you to maintain current office layout

When the restrictions are lifted, and the quarantine is over we can not simply just all skip back to work and expect employees to work in the same environments if they do not comply with the new normal of **“2 metres please”**

Now with **solio** semi-temporary extra distancing partitions you can maintain most of your current office layout without a complete re-configuration and ensure you have professional distancing.

Enquire now to ensure you have no more downtime
