name badges

Our range of uniquely designed name badges can identify and provide your business with a high quality, professional look

Our badges are printed in high resolution on strong PVC plastic and finished with a protective self healing gel dome that is crystal clear, and scratch resistant. They can be customised with your company logo, photo, or name, designation etc. Once your template is set up you can easily order and re-order any quantity of badges through our IDSnap online system.

Our fittings are designed to offer a strong, secure method of attaching the name badge to your clothing. The magnets are quick and easy to use, and will not damage garments.

- > No Minimum order quantity
- > Prices are based on quantity and type
- > Full colour digitally printed logo and text

magnet or pin
back attachment

photo id cards

ID Solutions produce photo IDs on a brilliant full colour, highly durable PVC card. The incorporation of your logo as a prominent feature of the identification card projects a positive company image wherever it is worn. Designs can incorporate your company's logo and colours, include a title, signature, employee number etc. We offer a professional in-house design service, at an affordable cost. Next day delivery when ordered by midday, using our online system IDSnap.

Large format ID Cards

These brilliant full colour ID cards are perfect for Stadiums etc that require an extra large credential, made from Teslin and laminated both sides, they are water proof and extremely durable. As the information is under the surface of the laminate, the print cannot be scratched off. These are the type of cards often seen at major sporting events such as the Olympics or World Cup Rugby. We have a 2 - 3 week lead time for this product.

IDSnap online

IDSnap Online is an easy to use, secure Internet system for producing Photo Identification Cards. Customers take photos and enter details online. This information is then sent to us for printing onto cards. By using IDSnap you save on expensive printer costs, labour time, and reduce errors on your cards. IDSnap Online is a database, so you can easily order re-prints for lost cards, plus you can keep using the same photos from year to year.

- step 1 >** Choose the source of the photo. eg digital camera, scanner, existing file etc.
- step 2 >** Upload & crop the image to suit.
- step 3 >** Enter details, e.g. name, title, expiry date, number etc.
- step 4 >** A preview of the finished card is displayed. If you are satisfied select finish. If the details need editing, return to step 3.
- step 5 >** Select the cards you want to order and send online to us for printing. **FINISHED!**

NEXT DAY DELIVERY

Orders received by 12pm are couriered overnight

artwork specifications

screen printed lanyards, offset printed membership cards, silicone wristbands & offset printed wristbands

> **Formats we are able to use:**

Vector files such as EPS, AI, PDF. All artwork should be editable, and all fonts should be supplied or converted to outlines.

> **Colours :**

We use the Pantone colour matching system for print colours. Computer monitors and printers display colours differently, so it is important that we have a Pantone colour if print colours are important. Due to variations in materials & processes used, colours may differ from the Pantone by 10%. Please note the lanyards are textured, therefore complicated designs will not print successfully.

ID Solutions printed ID, membership/loyalty cards and wristbands

> **Formats we are able to use:**

Files such as EPS, AI, PDF., JPEG (JPG), TIF, PSD, PNG

> **Colours:** Cards are printed in CMYK.

We try to match colours as closely as possible, however exact colours cannot be guaranteed

Sizing:

All artwork should be at the best possible resolution (300ppi)

Dye Sub printed lanyards

> **Formats we are able to use:**

Files such as EPS, AI, PDF., JPEG (JPG), TIF, PNG

> **Colours:** lanyards are printed in CMYK -please supply in this format

We have an inhouse graphic designer to help guide you with your artwork & layout

We may be able to use other formats. Please ask

> **Customer Confirmation:**

Once we have your artwork & details, we'll email you a sign-off so you can review & approve it before we begin your order.

tips for ID photos

- Aim for a small Jpeg (*.jpg) file on your camera settings: approx 50-200 kbs
- Head & shoulders are ideal (or make sure that head & shoulders are at least 2/3 of the picture)
- Aim for a mid tone plain background on a non reflective wall, (not glass, not dark) e.g. mid blue, mid grey
- Avoid busy backgrounds, keep it simple, and aim to keep the same background for consistency
- Photos that look yellow are due to taking photos under ordinary domestic lighting/light bulbs.
A very easy solution is to use flash, as this cleans out the yellow cast, (from about 2 metres with zoom lens is ideal)
- Natural light is even better, but make sure there is even lighting on the face - avoid dark shadows
