

PRESENTER

Arran Hunt, Turner Hopkins, Auckland

Arran received his first computer at age five, and started teaching himself the BASIC programming language a year later. In his teens he became one of the first million users of the internet. Arran completed a degree in science, before starting work as a technical business analyst. After several years in London, reengineering business processes for one of the world's largest companies, he returned to Auckland to work for several city councils. Arran has now moved to practicing law, providing legal advice influenced by his IT and business experience.

The statements and conclusions contained in this paper are those of the author(s) only and not those of the New Zealand Law Society. This booklet has been prepared for the purpose of a Continuing Legal Education course. It is not intended to be a comprehensive statement of the law or practice, and should not be relied upon as such. If advice on the law is required, it should be sought on a formal, professional basis.

CONTENTS

THE DARK SIDE OF THE INTERNET	1
THE INTERNET	1
