To whom it may concern

We contacted P F Olsen for advice on the harvesting of our 25 year old 12 Ha block of Pinus Radiata in Kaihu.

We were met on site by Peter and Dennis re our best options for harvesting and they had already been over the site and presented us with several options.

They had a best case - worst case scenario and as it turned out a pretty accurate assessment of expected tonnage which we surpassed. They clearly talked us through what needed to be done re fencing, roading and all local requirements, health and safety and also the contactors they would recommend.

We both felt very comfortable with the professionalism so signed a contract for P F Olsen to oversee the whole operation.

Being city folk we left it to the experts and were not disappointed with their efficiency and transparency.

They started on time, did everything they promised and we found them very transparent in all communications keeping us well informed at all times.

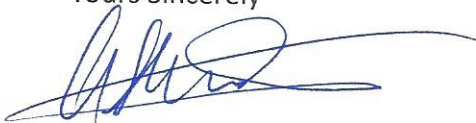

They met us on site during harvesting and were continually in touch with us as to progress.

We had heard some horror stories about getting paid but there had no worries at all with P F Olsen.

We would have no hesitation in recommending P F Olsen to other foresters and land owners.

P F Olsen have just replanted our block, once again efficiently, and we are meeting early in the new year for a consultation of a 90 Hectare block further up the road that we have a share in.

Yours Sincerely

Alan and Penny Woods
