

Harvest Testimonial

P F Olsen Ltd

As absentee Forestry Right owners we engaged the professional services of P F Olsen Ltd to manage the harvest and sale of a 2.8 hectare woodlot of Pinus radiata in Gisborne.

We found the staff very accessible and communicative through the processes of preparation, harvest and marketing. This involved the initial mapping, gaining of Resource Consent, site preparation, sourcing and managing harvest and transport contractors, frequent liaison with the property owner and the issuing of itemised and easily understood documentation. All this was followed up by prompt payment upon completion.

We look forward to working with the Olsens (Gisborne) team when our 40 hectare plantation is due to be harvested within the next decade.

Paul Dodgshun June 2011
