PF Olsen Ltd Forestry Services

Tenon engages PF Olsen for management of its local forest estate. This has been an ongoing relationship for over 10 years. PF Olsen looks after the management of establishment and tending operations, fire protection, forest health surveillance, security and harvesting.

We have always found the PF Olsen team to be knowledgeable, competent, friendly and extremely good with communication of work to be undertaken and results once completed. PF Olsen's Health and Safety and Environmental performance has also been excellent.

PF Olsen provide such good service that we also use them for additional services such as forest inventory and harvest planning.

As we want our forests to hold Forest Stewardship Council certification, PF Olsen's FSC group scheme is an added bonus.

Tenon Industries Ltd

Graeme Young

Forest and Fibre Resource Manager
