

I have recently completed a logging project on my property at Marapiu, North Dargaville, using the services of PF Olsen Ltd. Olsens have, at all times, demonstrated knowledge, experience and expertise in the harvesting business. At all times I was kept informed and consulted on any issues that arose on a project that could have easily had serious difficulties. The contractors used by Olsens were able to maximise timber recovery as well being sensitive to indigenous forest conservation, while still protecting internal fence lines and access tracks. The tidy up was also satisfactory.

I would thoroughly recommend anyone involved in harvesting a woodlot to contact Olsens. This is the 4th time over the last 20 years that I have harvested pines and know how operators vary. This harvest was managed in an excellent manner.

Should anyone require further information, please contact the writer.
